LED-AREALIGHT PRO A-SERIES

BEAM ANGLE AND OPTICS

greenius® offers sophisticated LED lighting solutions for every commercial outdoor area. Pole-mounted, surface-mounted, undermounted or surface-mounted... thanks to freely selectable mounting systems and optics with symmetrical or asymmetrical beam angles, our street and town square luminaires are highly flexible and suitable for any application.

Asymmetrical radiation pattern

- optimised light control (away from mounting point)
- minimised glare or stray light
- excellent luminous efficacy

Symmetrical radiation pattern

- Installation in the centre of the light cone
- uniform light distribution

We offer more than 20 optical lenses with different beam characteristics, which can be combined in any way to achieve the best possible illumination for any application.

ACCESSORIES

Our extensive range of mounting brackets, mast attachments and adapters offers the right solution for every type of installation.

OPTIONS

Colour options for luminaires and brackets (RAL desired colour available at extra charge):

Technically mature and highly efficient, our aesthetically sophisticated and robust LED lighting solutions for streets and squares guarantee optimal lighting in accordance with standards, even under adverse conditions: Different optics offer a wide range of applications. Extremely durable and almost maintenance-free. Solid housing made of die-cast aluminum, IP 67. Available as post-top or side-entry luminaire and for other types of installation - wide range of adapters and brackets for a wide variety of installation projects.

Resistant: 1,000 hours salt water certification according to ASTM B117 / ISO 9227: 2012
